

## ACKNOWLEDGMENTS

First and foremost, I would like to express my sincerest gratitude to my Supervisor Dr. Larry Monteilh for his continuous support of my DPhil study and analysis, for his patience, motivation, enthusiasm, and immense knowledge. His guidance helped me enlighten the first glance of the research and writing of this thesis. I couldn't have imagined having a much better advisor and mentor for my DPhil study.

Secondly, special thanks to the Chairman, Waha Oil Company Management Committee, Mr. Ahmed A. Ammar for giving me the chance and full support to conduct my research to evaluate the level of maturity of WOC's current project management to improve project performance. To Mr. Adel A. Abaza, Manager of Major Projects Department and Dr. Ahmed El-Magrabi, Manager of Training Department, for their encouragements, suggestions and methodical pieces of advice to use OPM3 model framework and further start my dissertation. To Mr. Jamal Alshailkali and Mr. Marlon Tuzon for their excellent collaboration. You supported me greatly and were always willing to help me.

I would also like to thank the OneWayForward Principal Assessor Ms. Rania Al-Maghraby for her invaluable efforts and support throughout the process of conducting the OPM3 assessment process, survey and her assistance with analyzing the results and recommendations.

My sincere thanks also go to my colleagues at the Waha Oil Company for their never-ending encouragement and continued support to me as a manager of the Engineering Department, working hand in hand on diverse projects. The completion of this study couldn't have been possible without the participation and help of so many colleagues whose names may not all be enumerated.

Last but not the least, to my family who is always being there for me and to all who in one way or another shared their support, either morally and spiritually throughout my life, thank you.
